

Notes on Electronic Edition

This edition is based on the printed edition published by Philipp Reclam jun., Leipzig in 1882.

All direct problems and selfmates have been computer tested using Matthieu Leschemelle's computer program *Problemiste*. The studies have been manually tested using *Fritz 6* with the Nalimov end-game database. The conditional problems, however, have only been checked for obvious errors.

Problems without a solution have been indicated with [†] after the stipulation, problems with short solutions with [§], and problems with multiple solutions with [*], and an indication of the problem given after the (original) solution. Any other errors discovered in the original solutions have been added in brackets, but obvious misprints have been silently corrected.

Two oddities are worth mentioning. In two-mover 70, both black bishops are on white squares. In three-mover 58, the solution given in the original is faulty. Healey's own collection gives the correct solution, however.

Solutions have also been changed from long to short algebraic form, and slightly expanded in cases where the extremely contracted solutions of the original seemed excessive. Lines not present in the original solutions have not been added.

Vorrede

Die von mir im Jahre 1881 veröffentlichte „Sammlung leichterer Schachaufgaben“ war ursprünglich nur dazu bestimmt, einen Anhang für mein „Kleines Lehrbuch des Schachspiels“ zu bilden. Die freundliche Aufnahme, die sie gefunden, sowie die unmittelbar an mich gerichtete Aufforderung zahlreicher Schachfreunde veranlassen mich, eine Fortsetzung folgen zu lassen, in der man jedoch auch eine Minderzahl schwierigerer Aufgaben antreffen wird. Um den inneren Zusammenhang beider Sammlungen zu unterhalten, habe ich den Titel nicht verändert.

In jene erste hatte ich viel amerikanische Aufgaben aufgenommen, welche Schönheit der Idee mit Gefälligkeit der Ausführung verbinden, namentlich, weil sie in Deutschland den Reiz der Neuheit für sich haben mußten. Ich entnahm sie theils ausländischen Schachzeitungen und Schachabschnitten, theils dem werthvollen Sammelwerke: „American chess nuts“, welches 1868 in New-York von E. B. Cook, W. R. Henry und G. A. Gilberg herausgegeben, 2400 Probleme umfaßt und die Lösungen in englischer Bezeichnung mittheilt. Die von mir daraus gewählten Meisterstücke Cheney's und Loyd's bilden, wie ich glaube, eine Zierde der ersten Sammlung.

In der Einleitung derselben ist der Werth der deutschen Problem-Composition genügend hervorgehoben.

Für die vorliegende zweite Sammlung habe ich eine größere Zahl deutscher Probleme zusammengestellt, welche gleich den übrigen fremdländischen, fast sämmtlich während der letzte beiden Jahrzehnte erschienen sind; jedoch einige ältere eingefügt, wie die des genialen englischen Problemcomponisten Graham Campbell, so wie andere, deren Ideen nachträglich häufig benutzt worden sind.

Man wird darunter vielen in Problemturnieren preisgekrönten

Compositionen begegnen. So haben z. B. die vierzügige No. 102 von Pradignat, die vierzügige von Fr. Dubbe No. 22 und von L. Noack No. 40 im Berliner Problemturnier des deutschen Schachbundes 1881 erste Preise erhalten. Der dreizügigen Aufgabe von Ehrenstein No. 42 und der vierzügigen von Dobruski No. 21 ist im Problemturnier von Brentano's Chess Monthly 1882, der vierzügigen von Schrüfer No. 46 im italienischen Problemturnier 1877 der erste Preis zuerkannt worden. Andere die Problemturniere betreffende Angaben wird man bei den Lösungen finden.

Da mir die Herren professor Johann Berger in Graz, Fr. Dubbe in Rostock, Max Kürschner in Nürnberg, Hermann Lehner in Wien, Nadebaum in Tessin, Fr. Schrüfer in Bamberg, eine Auswahl ihrer eigenen Compositionen zur Verfügung gestellt haben, halte ich es für meine Pflicht, für diese Freundlichkeit hiermit öffentlich meinen Dank auszusprechen. Ebenso danke ich Herrn Valentin für die gütige Ueberreichung vorzüglicher Ausgaben der von ihm redigierten „Frankfurter Schachzeitung.“

Einleitung

Man findet in dieser Sammlung 1. Direkte Matte (zwei, drei und vierzügige Aufgaben), 2. Bedingungsaufgaben, 3. Selbstmatte, 4. Studien. — Als Ergänzung zum Inhalt der Einleitung der ersten Sammlung möge hier noch Folgendes erwähnt werden.

I. Nebenlösung. Doppelzug.

Wenn eine Aufgabe durch zwei oder mehrere erste Züge in der aufgegebenen Zeitfrist gelöst werden kann, ist sie nebenlöslich. So würde dies z. B. die folgende zweizügige Loyd'sche sein, wenn auf

g4 der schwarze Bauer fehlte. Den alsdann würde Weiß nicht bloß durch 1. Tb2, sondern auch durch 1. Kf4 Matt mit dem zweiten Zuge erzwingen.

Im Falle die Lösung nur durch einen ersten Zug möglich ist, Weiß jedoch, nachdem Schwarz den ersten Zug beantwortet, in einer Spielart durch zwei oder mehrere Züge zum Ziel gelangen kann, so hat die Aufgabe einen Doppelzug (franz. *double coup*, engl. *dual*).

Der Doppelzug, der die betreffende Spielart nebenlöslich macht, ist kein Vorzug einer Aufgabe, jedoch jedenfalls gleichgültig, wenn die Spielart, die ihn zuläßt, unwichtig ist. Die Benachtheiligung, welche die Aufgabe durch den Doppelzug erleidet, steigert sich mit dem Werthe der Spielart, der er angehört. Geradezu eine Entstellung ist er, wenn er im Hauptspiel vorkommt. — In der folgenden Loyd'schen Aufgabe begegnet man einigen gleichgültigen Doppelzügen.

S. Loyd

Nur 1. Dg8 führt zum dreizügigen Matt. Antwortet Schwarz 1. Ta7, so entscheidet nur 2. Dh7; auf 1. Ta6 nur 2. Dg6. Auf 1. Ta3 jedoch kann Weiß 2. Dg6 oder Dh7; auf 1. Ta2 2. Dxb3, oder auch Dg7, -h7 spielen. Die *doubles coups* sind in beiden Fällen unerheblich. — Jedenfalls ist es besser, daß ein *double coup* unbedeutender Art stehen bleibt, als daß zu seiner Beseitigung die Aufgabe mit einem führ ihre Idee überflüssigen Material belastet wird.

II. Schlagen in Vorübergehn mit dem ersten Zuge.

Dies ist nach meiner Meinung zulässig, sobald aus der Stellung beweiskräftig hervorgeht, daß Schwarz mit seinem letzten Zuge den Bauer zwei Schritt vorgerückt hat, den Weiß en passant schlägt. Die folgende Aufgabe halte ich daher für durchaus correct.

Hier spielt Weiß:

1. gx6 und ist hiezu berechtigt, da Schwarz keinen andern Zug zu-

Ph. Klett

letzt gemacht haben kann, als f5, wie man bei genauer Prüfung der Stellung leicht erkennen wird.

III. Die Rochade mit dem ersten Zuge.

Diese ist unzulässig, weil man aus der Stellung nicht ersehen kann, ob Weiß bereits einmal der König oder Thurm gezogen hat. Die folgende Aufgabe von Loyd hat daher nach meiner Meinung keinen Anspruch auf Correctheit.

Hier spielt Weiß:

1. o-o-o, wodurch allerdings die Aufgabe in zwei Zügen gelöst wird. Mit Recht kann aber derjenige, dem sie vorgelegt wird, einwenden:

Aus der Stellung ist es nicht erkennbar, daß Weiß zu rochieren berechtigt ist. — Das Schachproblem außerhalb jedes Zusammenhangs mit der Schachpartie stellen zu wollen, halte ich für einen Mißgriff, der der Problemcomposition nicht förderlich sein kann.
